## (54) MAGNETIC DISK DEVICE

### (57)Abstract:

PURPOSE: To obtain a magnetic disk device improving reliability with high impact resistance.

CONSTITUTION: When a user lets the magnetic disk device fall erroneously, shock is diminished by shock absorbing members 16 attached to the four corner parts of a frame 2 and shock absorbing members 18 attached to the both end parts 20a of a connector accepting part 20, then the damage of respective mechanical parts is prevented. Also, the projecting shock absorbing members 18 attached in the neighbourhood of the both end parts 20a of the connector accepting part 20 is structured so as to freely extend and contract and the members 18 do not prevent the connector from attaching and detaching because the members 18 are fixed while retreating at the time of attaching to an external device.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
